Course Catalog for the 2019-Fall Term

Health and Better Living

TITLE	INSTRUCTOR	FIRST	WEEKS	STARTS	ENDS	FEE
Notre Dame: Then and Now	Kelly	Tue, 9/03/19	1	10:00 AM	12:00 PM	\$5.00
Let's take a look at that famous Gothic cathedral in Paris, which has recently been damaged by a horrific fire. Through the Great Courses, we will gain new insights into how this magnificent building was created and learn the importance of features from its justly famous facade to its dramatic flying buttresses. We will then look at the massive efforts to restore the structure.						
Mood Matters	Sims	Fri, 9/6/19	5	1:30 PM	3:30 PM	\$25.00
The idea that life is constructed in the mind and that living is essentially a series of experiences in which organisms think, act, and react, is contrasted with compelling scientific evidence that contradicts this view. In this course we will explore the notion that feelings are far more important than usually given credit for. The budding field of social neuroscience has uncovered surprising truths about the ways in which humans feel their way through life.						
Introduction to the New Science of Optimal Health	Kelly	Mon, 9/9/19	1	10:00 AM	12:00 PM	\$5.00
This course introduces a series of courses that seek to answer three key questions: What makes us sick? What makes us well? and What can we do about it? The remaining courses deal with the Biological Pathways, Psychological Factors, Social Factors and Diseases that affect our health. The courses are based in part on lectures by Professor Jason Satterfield of the Medical School at the University of California San Francisco from Mind-Body Medicine: The New Science of Optimal Health. It is not necessary to take all of the courses in this series.						
The New Science of Optimal Health - The Biological Pathways	Kelly	Mon, 9/16/19	2	10:00 AM	12:00 PM	\$10.00
There are four basic pathways by which the outside world get into our bodies. This second course in the series is based in part on lectures from Mind-Body Medicine: The New Science of Optimal Health, one of The Great Courses. These lectures focus on the biological pathways that affect our health. Although desirable, it is not necessary to take all of the courses in this series. Provisions will be made for those who did not take the earlier course to still benefit from this course.						
Puurfect Company - Senior Cats for Seniors	Camilleri	Tue, 9/24/19	1	10:00 AM	12:00 PM	\$5.00
Students will learn about the benefits of cat ownership, techniques for creating a space for your cat that has attitude, and tips for helping your cat have a happy, healthy and engaging life with you. You will learn about the premier cats only rescue organization in Marion County, Sheltering Hands. This non-profit organization has served thousands of area cats and their caretakers. From TNR (trap-neuter-return) to Seniors Cats for Seniors programs, it is working to improve the lives of cats and people who love them. Learn fun facts about cats and tips for solving common cat concerns and keeping your cat(s) healthy. Come away from this course with lots of cat information, resources and ideas. Whether you are a seasoned cat owner or are thinking about adding a cat to your home, you will enjoy this informative session.						
The New Science of Optimal Health - The Psychological Factors	Kelly	Mon, 9/30/19	4	10:00 AM	12:00 PM	\$20.00
This third course in the series that examines evidence supporting links between cognition, emotions, personality, behavior, stress and health. It includes lectures on these psychological factors from the course Mind-Body Medicine: The New Science of Optimal Health. These lectures focus on the psychological pathways that affect our health. Although desirable, it is not necessary to take all of the courses in this series. Provisions will be made for those who did not take the earlier courses to still benefit from this course.						
Friends	Sherwood	Tue, 10/1/19	2	10:00 AM	12:00 PM	\$10.00
It has been said that friendships come into your life for a reason, a season or a lifetime. Looking for a friendship must be as intentional as choosing any aspect of your life. Conflicts can arise, former friends move and interests change. It is important to look at transitions, but also to look at friendship itself and why we never out grow the need for positive relationships. We will also discuss the value and strategies involved in making new friends in adulthood.						
	Hunt	Tue,	6	1:30	3:30	\$30.00

The Science of Mindfulness - A Research-Based Path to Well-Being

10/8/19

PM

PM

Mindfulness—awareness of present experience with acceptance—is a deceptively simple way of relating to the contents of our minds that has been successfully practiced to alleviate psychological suffering and enhance emotional well-being for over 2,500 years. Cutting-edge scientific research and rapidly accumulating clinical experience are now validating what ancient wisdom traditions have long taught: that mindfulness practice is an effective antidote to our hardwired propensity for psychological distress and is a reliable pathway to increased wisdom, compassion, and fulfillment. This course is based on lectures by Harvard Medical School Professor Ronald D. Siegel from The Great Courses course of the same name.

Centenarians: The Big One O, O!

Sims

Fri,
10/11/19

4

1:30
PM3:30
PM

\$20.00

Is living to 100 more a matter of nature or nurture? A centenarian is a person whose chronological age is 100 or more. Developmental psychologists are particularly interested in understanding the factors that contribute to longevity. In this course we explore theories of lifespan development with a particular focus on late adulthood.

Defining Hope in Hospice & Palliative Care

Lossada

Thu,
11/7/19

1

2:00
PM4:00
PM

\$5.00

Join Dr. Mery Lossada, Neurologist, Psychiatrist and Chief Medical Officer at Hospice of Marion County as she provides real-life examples through six short video clips of hospice patients' stories. She will discuss medical and non-medical comfort measures that are used to help patients and families feel safe, connected or secure in their physical setting, as well as in their emotional and spiritual place about end-of-life care choices. She will be joined by Jessica McCune, Director of Bereavement Services.

The New Science of Optimal Health - The Social Factors

Kelly

Mon,
11/18/19

4

10:00
AM12:00
PM

\$20.00

This course analyzes the social and ecological factors that are thought to be critical to health and disease, including socioeconomic status and social support. This course is based in part on lectures from Mind-Body Medicine: The New Science of Optimal Health. It focuses on the social pathways that affect our health. Although it is desirable, it is not necessary to take all of the courses in this series. Provisions will be made for those who did not take the earlier courses to still benefit from this course.

All About Chocolate with Tastings

Holloran

Fri,
12/6/19

2

1:30
PM3:30
PM

\$10.00

All aspects of chocolate will be addressed: what it is; its history; where it comes from; how it is made; why we like it; what part is good for us; and what part can cause problems. In addition to true chocolate bars, we will be tasting some bars with added ingredients, which is now the trend in chocolate. These tastings will expand your horizons and palate, as well as provide the vocabulary for describing the multitude of flavors in chocolate. Various chocolate baked goods, sauces, spreads and drinks will also be tasted and their recipes will be shared. Throughout the course Bob will share his experience in making and marketing organic-certified, raw chocolates spreads. There will be nominal additional fee to cover the costs to conduct the tastings.

History and Geography**TITLE****INSTRUCTOR****FIRST****WEEKS****STARTS****ENDS****FEE****Modern Middle East**

Kirk

Wed,
9/04/19

6

1:30
PM3:30
PM

\$30.00

The Modern Middle East will begin with a look at the pre-Islamic world, the birth and rise of Islam, the period of Islamic empires, colonization of the Middle East and into the modern period of statehood in the area.

Native American History

Kirk

Wed,
10/23/19

6

1:30
PM3:30
PM

\$30.00

Native American History will look at the peoples of North America from their first contact with European explorers through the period of colonization. It will carry on to their interaction with and under the growing United States, up until the present day.

The Reign and Wane of Western Europe

Coffey

Wed,
10/30/19

4

10:00
AM12:00
PM

\$20.00

The Reign and Wane of Western Europe (Portugal, Spain, France and Italy) from 1500 to today is an incredible story of global discoveries, colonization, crusades, world wars, unification into the European Union, and now the waning under financial and geopolitical stress. This course is designed for those interested in a historical perspective of Western Europe's past 500 years of great achievements, failings and its modern-day challenges as it seeks to strengthen and reconcile its future.

Ancient America - Southwest North America

Hautanen

Thu,
11/14/19

4

1:30
PM3:30
PM

\$20.00

A broad look at the first peoples of the Southwest of North America, and the civilizations that arose there up to first contact with Europeans. We will utilize The Great Courses lecture series Ancient Civilizations of North America by Edwin Barnhart, the same professor we have seen in previous courses on Mesoamerica and South America.

The Histories by Herodotus	Holloran	Tue, 11/19/19	3	1:30 PM	3:30 PM	\$15.00
This course completes our study of Herodotus with a review of his work: The Histories. This course is based on lectures from one of The Great Courses by Professor Elizabeth Vandiver. The Summer Term course focused on Herodotus and the context that contributed to his inquiry and writing of The Histories, which is credited as being the birth of history writing. In this course Professor Vandiver will review the most of the books of The Histories. Students who did not take the Summer Term course are welcome to take this course. Selected information from the Summer Term course will be available to for new students and former students to refresh their memories.						
New England Journal: Traveling in the Summer Through New England	Kelly	Tue, 12/3/19	1	10:00 AM	12:00 PM	\$5.00
Come with me as we take a trip through the interesting New England states. We will begin in Boston and then take off across the land. If you know the area, bring your memories with you and share them.						
Human and Cultural Geography II	Crawford	Wed, 12/4/19	3	10:00 AM	12:00 PM	\$15.00
This course is a continuation of the Spring Term course at the request of its students. The macro science of geography has always been an interest of mine. This course is drawn from the Great Courses on the above subject by Professor Paul Robbins of the University of Wisconsin. He covers subjects such as human effects on the environment, population growth, agricultural practices, urbanization, climate change and more. Provisions will be made for those who did not take the earlier course to still benefit from this course.						
Literature and Language						
TITLE	INSTRUCTOR	FIRST	WEEKS	STARTS	ENDS	FEE
IMPERFECT IDEAL Utopian and Dystopian Visions	Coleman	Thu, 10/31/19	6	10:00 AM	12:00 PM	\$30.00
Throughout the ages, people have looked at their communities and dreamed of how they could be perfected. But such dreams, no matter how well-intentioned, can result in conditions far worse than what came before. The selections in Imperfect Ideal illustrate the best and worst of these utopian and dystopian visions, challenging readers to address the perennial questions of how society should be structured and governed, as well as what kind of communities are the most conducive to human fulfillment, both privately and in the civic arena. In addition to reading the book we will be seeing half-hour tapes entitled: Great Utopian and Dystopian Works of Literature. For the FIRST session please read: The Ones Who Walk Away from Omelas, by Ursula Le Guin. We will need a minimum of 10 and up to a maximum of 20 for the class to be held. The book Imperfect Ideal may be ordered from The Great Books Foundation (800-222-5870) or as the Kindle Edition from Amazon.						
Philosophies and History of Religions						
TITLE	INSTRUCTOR	FIRST	WEEKS	STARTS	ENDS	FEE
Burned Bras, Boogey Men, Cherry Trees, and Gods: What Is the Truth About Myths?	Cooper	Wed, 12/11/19	1	1:30 PM	3:30 PM	\$5.00
The term "myth" is used in a number of ways--sometimes for harmless legends and tall tales, other times for shrewd misinformation or widespread fears. We will look at the roots of some social panics (such as satanic ritual abuse and alien abductions), cultural identity stories (Pilgrims and Founding Fathers), and other recurrent myths and consider whether our brains are hard-wired for irrational beliefs.						
Ancient Texts in Context: How Much Can We Know About Historical Figures from the Distant Past?	Cooper	Wed, 12/18/19	1	1:30 PM	3:30 PM	\$5.00
Creating a understanding of a famous person from the ancient world is a difficult and tricky task. We will consider one of the most famous people of all time, Jesus of Nazareth, and look at what ancient texts--scriptural and secular--really say (and do not say) about him.						
Science and Technology						
TITLE	INSTRUCTOR	FIRST	WEEKS	STARTS	ENDS	FEE
The Power of Mathematical Visualization	Hautanen	Tue, 9/3/19	5	1:30 PM	3:30 PM	\$25.00
Too many people believe that they simply aren't good at math. But what if you could learn to see mathematical problems in new and helpful ways? What if you could return to difficult mathematics topics from your past with renewed power, ease, and joy? The art of thinking visually is a key component to mathematical success. This course is based on lectures by James S. Tanton, Ph.D., Mathematician-at-Large, Mathematical Association of America from one of The Great Courses.						
	Stephens	Thu,	6	10:00	12:00	\$30.00

Cyberterrorism			9/5/19		AM	PM	
<p>Cyberterrorism creates international, national, industrial and personal threats posed by malicious individuals and terrorist groups. It can promote disruptive attacks against information systems which can create alarm, panic, or physical disruption. In this six session course we will examine the following topics which defines the cyber threat: (1) Hacking and the Dark Web, (2) Use of Artificial Intelligence for Data Mining, (3) The Psychological Processing of Misinformation, (4) Cyber Conflict and Geopolitics (5) Nuclear and Electromagnetic Pulse Threats and (6) Safeguards from Hacking and Cyberterrorism.</p>							
Understanding the Quantum World and How It Was Discovered I	Holloran	Fri, 9/6/19	6	10:00 AM	12:00 PM		\$30.00
<p>This course is the first of two Fall Term courses. The microscopic world of particles of atoms, electrons, and photons—is ruled by quantum mechanics. It is a wild world where particles become waves, waves become particles, and our understanding of how physical objects behave is challenged to the core. This course and its follow on course explore the fascinating findings scientists have uncovered about how quantum particles operate. These courses rely primarily on lectures by Purdue University Professor Erica W. Carlson from The Great Courses (TGC): Understanding the Quantum World. Without resorting to mathematics, she provides a thorough introduction to and understanding of the strange quantum world that exists at the scale of atoms. In parallel with Professor Carlson's lectures, the history of how quantum mechanics evolved from 1900 to the 1950s will be told through the work and lives of 12 Nobel Prize winners. These courses do not require an understanding of mathematics. However, supplemental resources will be provided for those who seek a more rigorous understanding of the concepts and methods of quantum mechanics.</p>							
Science Surprises	Pealer	Tue, 9/10/19	1	10:00 AM	12:00 PM		\$5.00
<p>For biology enthusiasts, this monthly class will be whatever videos, articles, websites I have found interesting. It is sort of an in-person blog instead of an online blog!</p>							
Tech Clinic - Workshop	Davis	Tue, 9/17/19	1	10:00 AM	12:00 PM		\$5.00
<p>Do you need help with a computer problem? Do you want to learn new things about technology and the internet? Tech Clinic workshops will provide you with useful tips, hardware and software recommendations, helpful advice, and teach you about getting more from your computers and devices. During each 2-hour session, you will have ample time to ask questions and discuss problems. The focus will be on Apple products and software, but we may include other technologies. Topics will change each workshop so you will never know exactly what to expect! Bring your laptop or mobile device with you if you can.</p>							
Science Surprises	Pealer	Tue, 10/15/19	1	10:00 AM	12:00 PM		\$5.00
<p>For biology enthusiasts, this monthly class will be whatever videos, articles, websites I have found interesting. It is sort of an in-person blog instead of an online blog!</p>							
Refresher on How DNA Functions to Control Inheritance	Pealer	Wed, 10/16/19	1	1:30 PM	3:30 PM		\$5.00
<p>DNA is critical to understanding modern data related to evolution. This summer, members of the course, What Darwin Didn't Know, felt they needed a refresher on DNA. This one-session course will review the structure and function of DNA. While the class will stand alone, it will be helpful for understanding the second session of What Darwin Didn't Know, which begins on 10/22.</p>							
Understanding the Quantum World and How It Was Discovered II	Holloran	Fri, 10/18/19	6	10:00 AM	12:00 PM		\$30.00
<p>This course is the second course in a series of two courses. While it is desirable to have taken the first course in the series, a summary of the essential concepts from the first course will be provided to help new students follow the concepts presented in this course. For additional details on this series of courses, see the course description for the first course.</p>							
What Darwin Didn't Know: The Modern Science of Evolution 2	Pealer	Tue, 10/22/19	4	10:00 AM	12:00 PM		\$20.00
<p>This course is a continuation of one during Summer Term. It is based on a new course from The Great Courses. Here is its description: "Retrace Darwin's path to his theory of evolution by natural selection, which appeared in his masterpiece The Origin of Species, published in 1859. Encounter collector Alfred Russel Wallace's astonishing, almost identical, key insight. Detail the types of evidence, not known to Darwin, that have accumulated in the century and a half since his time, deepening and extending his ideas to a remarkable degree." Genetics is the major understanding that has developed significantly from Darwin's day, so it is the basis for many of the lectures—how our knowledge has changed and how it impacts many areas that help support our present day understanding of Evolution. Other resources will be used to extend ideas described in the lectures from The Great Courses. Provisions will be made for those students who did not take the first course to learn what they missed.</p>							
Tech Clinic - Workshop	Davis	Wed, 10/23/19	1	10:00 AM	12:00 PM		\$5.00

Do you need help with a computer problem? Do you want to learn new things about technology and the internet? Tech Clinic workshops will provide you with useful tips, hardware and software recommendations, helpful advice, and teach you about getting more from your computers and devices. During each 2-hour session, you will have ample time to ask questions and discuss problems. The focus will be on Apple products and software, but other technologies may be included. Topics will change each workshop so you will never know exactly what to expect! Bring your laptop or mobile device with you if you can.

Tech Clinic - Making Better Use of Web Searches	Hautanen	Mon,	1	10:00	12:00	\$5.00
		10/28/19		AM	PM	

Tips and tricks for making better web searches. How to phrase searches for better results. How to rank the results you do get. When to do advanced searches. Saving, repeating, recalling old searches. Specific strengths and weaknesses of popular search engines like Google, Bing, Yahoo, AOL etc.

Tech Clinic -Workshop	Davis	Mon,	1	10:00	12:00	\$5.00
		11/4/19		AM	PM	

Do you need help with a computer problem? Do you want to learn new things about technology and the internet? Tech Clinic workshops will provide you with useful tips, hardware and software recommendations, helpful advice, and teach you about getting more from your computers and devices. During each 2-hour session, you will have ample time to ask questions and discuss problems. The focus will be on Apple products and software, but we may include other technologies. Topics will change each workshop so you will never know exactly what to expect! Bring your laptop or mobile device with you if you can.

Science Surprises	Pealer	Tue,	1	10:00	12:00	\$5.00
		11/19/19		AM	PM	

For biology enthusiasts, this monthly class will be whatever videos, articles, websites I have found interesting. It is sort of an in-person blog instead of an online blog!

Tech Clinic - What You Need to Know Giving, Receiving or Using a SmartPhone and a Tablet	Hautanen	Tue,	1	10:00	12:00	\$5.00
		12/10/19		AM	PM	

This course will start by explaining the various types of smartphones and tablets based on the two main operating systems in use: the Android operating system provided by Google and the Apple IOS operating system. The rest of this course will describe and demonstrate the basic physical features of Android phones and tablets, as well as settings and commonly used apps. We will also go over use of the user interface and the different screens. We will also discuss security, use of the app store, and managing your apps in general for good performance without unnecessarily draining your battery or going over your data limit.

Tech Clinic - What You Need to Know Giving, Receiving or Using a Computer	Hautanen	Mon,	1	1:30	3:30	\$5.00
		12/16/19		PM	PM	

This course will start with an explanation of the differences and relative advantages of laptop, All-in-One and other types of desktop computers and the operating systems that run on them. The rest of this course will include a short review of the basic features of a Windows 10 computer, with additional discussion of more topics such as security and virus protection, and new features like virtual desktops. We will also discuss common productivity apps, such as word processors and spreadsheets, and pros and cons of using free versions of those versus using Microsoft Office.

Special Event

TITLE	INSTRUCTOR	FIRST	WEEKS	STARTS	ENDS	FEE
Day of the Dead and SLI Halloween Party	Kelly	Thu,	1	1:30	3:30	\$5.00
		10/31/19		PM	PM	

In Mexico Day of the Dead is a real celebration when people spend months preparing to go to the cemeteries to eat and celebrate with their ancestors. Think this strange? At the turn of the century many places in the US had Decoration Day--when people went to the cemetery for picnics (there were no parks). This will be an interesting session culminated with great food and hopefully Bob will bring some of his famous flourless chocolate cake. Come and celebrate Halloween with your Senior Learner friends.

Senior Learners Holiday Party	Kelly	Tue,	1	1:30	3:30	\$5.00
		12/17/19		PM	PM	

Come for some great fun and terrific food (including Bob's famous flourless chocolate cake). See you there.

the Arts

TITLE	INSTRUCTOR	FIRST	WEEKS	STARTS	ENDS	FEE
Exploring Mixed Media with Water Colors and Colored Pencils	Craggs	Wed,	6	10:00	12:00	\$30.00
		9/4/19		AM	PM	

In this class we will learn to use five basic color harmonies to create a more appealing project. We will also learn to emphasize color, line, value and texture to achieve compositional unity. Class materials will be provided for a \$10 fee.

The Craft of Drawing the Human Face	Thomas	Thu, 9/5/19	4	1:30 PM	3:30 PM	\$20.00
This course was developed to explore step-by-step how to successfully draw realistic portraits. In the first week students will start with looking for the complete shape of the head and proportions of the face. Each week we will draw facial features, eyes, nose, mouth and ears in detail to gain an understanding of the construction of each. The final week we will use the direction of light to emphasize the facial forms of the head using pencil. Materials: Bring 2B soft graphite pencil and sketch paper, photo copy close up of a person.						
For Love of Film: Road Trip Movies	Smith	Mon, 9/09/19	5	1:00 PM	4:00 PM	\$25.00
Join us in viewing and discussing road trip movies including Harry and Tonto starring Art Carney and Ellen Burstyn, The Leisure Seeker starring Helen Mirren and Donald Sutherland, Little Miss Sunshine starring Alan Arkin, Steve Carrell and Toni Collette, Thelma & Louise starring Geena Davis and Susan Sarandon and Green Book starring Mahershala Ali and Viggo Mortensen. Popcorn will be provided to enhance the viewing experience.						
The Craft of Drawing Perspective	Thomas	Thu, 10/3/19	4	1:30 PM	3:30 PM	\$20.00
This course you will use lines to create the illusion of three-dimensional geometric shapes to help make a more realistic drawing. Each week we will work with the horizon line, eye level, center of vision, and vanishing point in one and two point perspective. We will work with how to quickly divide spaces in equal parts to draw foreshortened objects. Materials: Bring 2B soft graphite pencil and sketch paper.						
For Love of Film: The Joy of Food	Smith	Mon, 10/14/19	5	1:00 PM	4:00 PM	\$25.00
Join us in viewing and discussing films that center around the joy of food including Like Water for Chocolate directed by Alfonso Arau; Chef starring Jon Favreau and Robert Downey Jr.; The Hundred-Foot Journey starring Helen Mirren and Om Puri; Eat, Drink, Man, Woman directed by Ang Lee; and Eat, Pray, Love starring Julia Roberts and Javier Bardem. Popcorn will be provided to enhance the viewing experience.						
Frida and Diego: Mysterious Mexican Painters	Kelly	Wed, 10/16/19	1	10:00 AM	12:00 PM	\$5.00
Frieda Kahlo and Diego Rivera were two of the most fascinating artists in history. I had the privilege of visiting both their homes and museums during a recent trip to Mexico. You will learn of their tumultuous relationship and problematic lives. But, that will be overshadowed by a presentation of their unique paintings. CF has three prints by Diego in the lobby of the University Center.						
State of the Arts at CF and the Appleton Museum	Satterfield	Thu, 10/17/19	1	10:00 AM	12:00 PM	\$5.00
This course will be a panel discussion presented by representatives of the various visual and performing arts at CF and the Appleton Museum. We will donate the student fees from this course to the Appleton Museum for it to use in support of the arts in our community. A subsequent course will include a panel discussion of the state of the Arts in the rest of Marion County.						
State of the Arts in Marion County	Baillie	Thu, 10/24/19	1	10:00 AM	12:00 PM	\$5.00
This course will be a panel discussion presented by the arts leaders in our community. Jaye Baillie, the Executive Director of the Marion Cultural Alliance is convening the panel for us. We will donate the student fees from this course to the Marion Cultural Alliance for it to use in support of the arts in our community. A separate course will include a panel discussion of the state of the Arts at CF and the Appleton Museum.						
Sight and Sound: Movements in Art and Music	Satterfield	Fri, 11/8/19	3	1:30 PM	3:30 PM	\$15.00
In this course students will learn about parallels between movements in the visual arts and music, including the rococo, romanticism, neoclassicism, impressionism, expressionism, and minimalism. Students will have the opportunity to look at examples of artworks exemplifying each movement and listen to music by significant composers like Couperin, Debussy, Ravel, Stravinsky, Schoenberg, Webern, Berg, and Glass.						
For Love of Film: The Partnership of Marriage	Smith	Mon, 12/2/19	2	1:00 PM	4:00 PM	\$10.00
Join us in viewing and discussing two 2018 award winning films that depict very different views of the marriage partnership. We will be seeing The Wife starring Glenn Close and Jonatan Price and On the Basis of Sex about Ruth Bader Ginsberg and her husband starring Felicity Jones and Armie Hammer. Popcorn will be provided to enhance the viewing experience						

*Senior Learners, Inc., sponsors events offered by non-profit organizations, such as the CF Foundation and its Appleton Museum, which the Board considers will be of interest to our students.
